

ITALTILE COMMERCIAL - LAUFEN

LAUFEN

SWISS MADE

FOCUS ON HYGIENE

Laufen, always two steps beyond the edge of world design, has pushed back the frontiers of sanware design science and aesthetics once again, with possibly their most extra-sensory toilet yet. It's the **Cleanet Navia**, and we can't decide if it's an example of artificial intelligence, or intelligent art.

RIMLESS HYGIENE

NAVIA
INTELLIGENT
ART

MAIN ADVANTAGES

SHOWER TOILET

- Full ceramic body, no plastic parts!
- Thermal cleaning system (70 degrees hot water)
- Descaling function
- Rimless, LCC
- Removable seat (for easy cleaning)
- Self cleaning/pre-cleaning and replaceable nozzle
- Very similar design like a "normal" wallhung toilet (no UFO from the mars)
- Most hygiene product on the market
- Global aftersales
- Easy handling for end-consumer

RIMLESS

All LAUFEN wallhung toilets are available as rimless toilets. No rim means no space for bacteria and germs to stick and to hide. Beside that less cleaning effort/time is needed. Compared to competitors LAUFEN is having a proofed history of producing rimless toilets which are not facing any problems with over splashing. This due to extensive testing from external laboratories in Europe. Attention: EN norm is not giving clear standards for over splashing due to that it can be that toilets produced in Asia/Middle East with EN certificate can still over splash. Because of that in Switzerland and Germany consumer organization have done extensive testing to ensure zero over splashing. LAUFEN toilets have passed all these tests and still proof a very powerful flush.

Special suitable for public buildings, hospitals but also in private houses or hotels for more hygiene and efficiency

SURFACE FINISH LCC & RIMLESS

REMOVABLE SEAT & COVER

INTERGRATED DESCALING

HYGIENIC & EASILY REPLACEABLE HEAD & COVER RING

LAUFEN CLEAN COAT

Double glazing for the perfect surface

MAIN ADVANTAGES

Beside the fact that the glazing of LAUFEN products is much thicker than many other competitors we even offer LCC finishing, which includes another glazing over the standard glazing to ensure an extremely smooth surface and gives bacteria no chance to stick on the surface. Very often used in hospitals or public places.

Design Award

NOMINEE 2014

We guarantee a full glazing of our products for all areas which can come in touch with water. Compared to competitor products we are also glazing the invisible part of the toilet siphon, the toilet bowl rim (if the toilet is a non-rimless WC) and also the overflow channel of the washbasins. This is an additional production step and due to that connected with additional costs. However we insist on doing this in order to ensure a long lifecycle for our products and guarantee the highest standard of hygiene.

CROSS SECTION STANDARD VS RIMLESS
