

Italtile Commercial

**800 x 1600mm
Tile Ranges**

Beautiful *marble* flooring started its journey into our homes as limestone. Millions of years of metamorphosis—intense heat and pressure—produced a dense variegated stone that can be polished to a high shine.

With the latest inkjet and manufacturing technology we are able to replicate the finest marble flooring. With the luxury look and feel of natural marble yet carrying the low maintenance and long lifespan of tiles. Marble reflects light to make rooms seem more spacious while offering a touch of elegance.

Our large range of *marble tiles* come in varying colours and surface patterns. The contrasting colour lines running through the surface are known as veining, which can be heavy and pronounced or delicate and barely noticeable.

Tile Ranges | 800x1600 mm

Why *Marble*

For its elegance and resistance, marble is one of the most successful options when it comes to achieving the perfect design of your home. It is a very decorative and timeless material that does not lose its validity over time.

Marble is a natural stone that gives an original and attractive style to any space. Its aesthetics, versatility and sophistication make it a benchmark in interior design, which never goes out of style.

Our Marble Tiles can be installed both as floor and wall tiles, as well as in any space: kitchens, bathrooms, living rooms, etc. It will add a distinguished and stately touch to each room.
