Installation Guide

Torino products are handmade products cast in resin, marble dust, pigments, sand and oxides with a porosity of 0.27% (as tested by CSIR). There can be slight colour and size variations as all products are individually hand-crafted.

Torino products need to be installed correctly. Installation instructions are to be strictly adhered to. If these procedures are complied with, Torino products should be trouble free and last for years to come. We have been manufacturing these products for 17 years plus and are aware of numerous projects where the products are still in good condition.

Whilst Torino endeavours to ensure that any advice, recommendation or information is accurate and correct, the company cannot, because Torino has no direct or continuous control over where and how Torino products are applied, accept any liability either directly or indirectly arising from the use of Torino products, whether or not in accordance with any advice, specification, recommendation or information given by the company.
