# About us

## Italtile Mission Statement:

Italtile strives to be the leading retail brand offering a wide range of premium fashionable products in a dynamic environment that is difficult to replicate while serving customers with incomparable passion and professionalism.

With a national footprint, we always strive to deliver a bespoke, end-to-end service of the highest quality, from planning stage to final finishes.

We are passionate about our products and our partnerships and we love what we do.

Italtile Commercial Division was established in 2009 as a part of Italtile Retail. Italtile Retail forms part of the JSE-listed [1988] Italtile Limited Group. Italtile has been in business in South Africa since 1969. Italtile Commercial Division supplies premium quality porcelain and ceramic tiles, matching trims, sanitaryware, bathroom accessories, taps

and related products to the commercial projects market in South Africa and other countries in Sub-Saharan Africa.

With our range of top international brands and the very best of local product, the Commercial Division supplies a one-stop service to architects, interior designers and developers specifying finishes for commercial developments. With dedicated, highly knowledgeable, passionate teams we supply an outstanding service offering to match our premium product range.

# Nature and Nurture

How we humans create connection.

'Nature or nurture?'. That's the great question about the human condition: what makes us who we are as we grow up? And the answer comes back as - both. Nature AND nurture together, in all their mystery and magic, define us.

We're building living spaces that are centered around natural light, to reduce the use of electric lights. We're loving natural fibres, textures and fabrics. We're thinking solar and talking about 'getting off the grid'. And, now that the lockdown is lifting, we're bringing home the treasures we find on our short journeys and walks: a porcupine quill, a handful of precious shells, tumbled sea glass.

This is the rise and rise of our nurturing natures. And of allowing and enabling nature to nurture us. This is a regenerative approach to life, rather than our grandparents' more degenerative approach which never thought to look to the future, with harmful fossil fuels, everything throwaway, plastic, pollution, and just generally unsustainable choices. But we know better, so we do better.

Where does Italtile fit into all this?

Right slap bang in the middle of it all. In step with the mindful curve, we are - along with you - making careful choices when it comes to fashion, style and trends. Understanding that buying local is the better option for our planet and our people. And, when choosing an imported product, we scrutinize the ethics of its journey from there to here. We actively seek out the things that allow us to offer you beautiful living and conscious experiences in harmony with the planet. It's our LiveGreen mandate.

Nurturing sustainable partnerships. In pursuit of an ever more powerful LiveGreen ethos, we've formed partnerships with designers and manufacturers locally and internationally who subscribe to the same sustainable principles and push us to greener heights, too.

Italtile service. It's in our nature to nurture. So we offer a 360 service that wraps around you, and extends all the way from our showroom floor to your door. Put us to the test. You'll get our undivided attention, from interior design-certified sales consultants, a sample service, delivery and professional installation services, to the completed package.

# LAUFEN

**Laufen stands for swissness, quality and design.**

The personality of this highly traditional Swiss brand reflects a symbiosis of design, quality and functionality. LAUFEN, the premium brand under the ROCA umbrella, is one of the world's leading manufacturers with a global distribution network.

# LAUFEN CLEAN COAT

Lifelong perfection - LCC-enhanced ceramic surfaces. When new, all washbasins and WCs are impeccable and look brilliant. To make sure they stay that way, LAUFEN has developed its innovative surface finish LAUFEN CLEAN COAT. It is a silicate ceramic vitreous coating baked on over the original glaze. The benefits of this advanced process are considerable.

The surface glazing is immaculately smooth and, as an inseparable part of the ceramics, also exceptionally hard and therefore practically indestructible. Grime, limescale and bacteria don't stand a chance on the pore-free surfaces and are, for the most part, simply rinsed away by the running water. This takes the effort out of cleaning and ensures the highest standards of cleanliness and hygiene on a permanent basis.

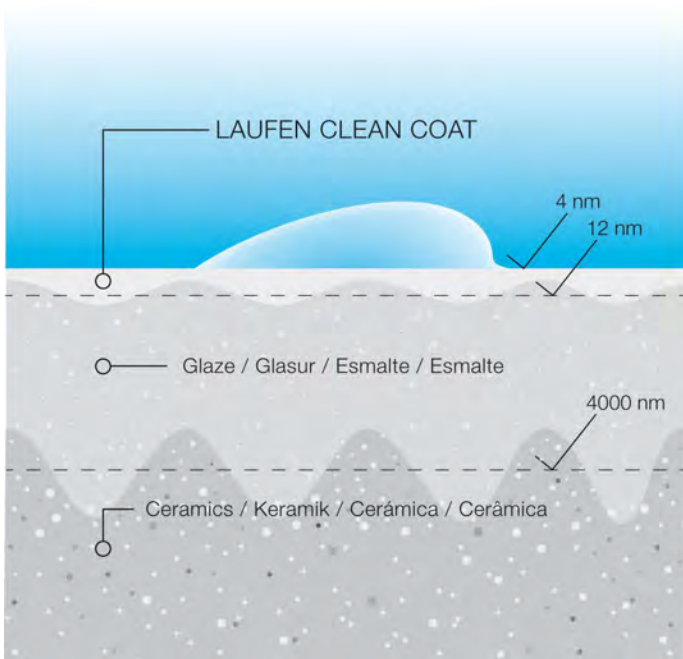

Effortless hygiene - LCC interacts with the natural force of water. With a coarseness value of 4 nanometer, LCC-enhanced surfaces are much smoother than conventional coatings so grime simply doesn't stand a chance. The water also adheres better to the hydrophilic LCC ceramic and rinses off grime as it runs over the surfaces. Cleaning agents and disinfectants are also spread more easily and are thus more efficient. Another advantage of LCC is its high resistance to aggressive cleaning products and chemicals so that even incorrect ceramic treatment cannot do any harm.

Highly recommended for public and private use - LCC makes a brilliant impression everywhere. LCC is a surface finish that impresses everyone. End consumers can enjoy the pleasure of an immaculate,

brilliant bathroom for many years. Installers and wholesalers can offer their customers an innovative product that combines high added value and high long-term investment security. And architects and planners appreciate LCC's proven credentials both in the private and public sector. LAUFEN LCC - the innovative ceramic glazing for all bathrooms and washroom facilities.

## LCC benefits:

- Hygienically clean
- Robust and enduring
- Pore-free and exceptionally smooth
- Particularly easy to clean
- Fewer cleaning agents are required
- Environmentally friendly

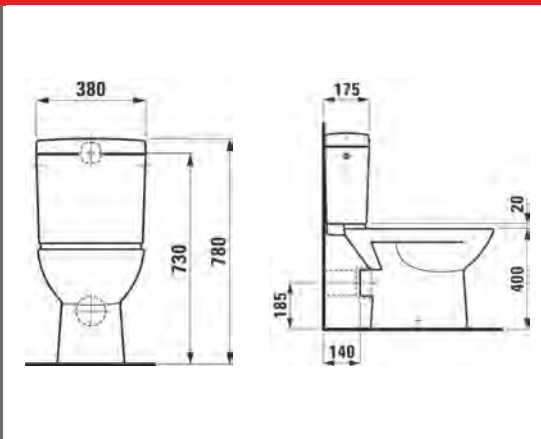

# LAUFEN

## PRO B

LAUFEN pro is a comprehensive bathroom range, which offers the ideal solution for every spatial situation and requirement and also reflects the building values of the current generation. Industrial design is the modern answer to the once revolutionary idea that everyone has a right to enjoy beautiful forms. Good design is now no longer a right reserved for the most affluent customers. Modern methods of industrial production and designers such as Peter Wirz of Vetica, who put optimum manufacturing feasibility at the forefront of their creative processes, make such sanitary ware ranges as LAUFEN pro possible. This does not just benefit the designer, more importantly, it also benefits the customer.

# LAUFEN

## SAPHIRKERAMIK

SaphirKeramik, a material innovation filed for patent from Swiss manufacturer Laufen that is set to change the bathroom landscape. Where once there was the curve, now there's the tight edge-radius. Fuller forms have given way to delicate, but robust, filigree walls; A super-strong ceramic material that allows itself to be fashioned along minimal, architectural lines.

 SaphirKeramik

# Saphirkeramik / Revolutionary thinking

Historically, vitreous china and fine fireclay have been used to make ceramic sanitary ware. And with good reason: they're hygienic, hardwearing and recyclable. Laufen itself is renowned for maximizing their creative potential, notably by manufacturing the world's largest fine fireclay pieces.

## Freedom to Reshape

With SaphirKeramik – a unique material perfected after five years of intensive research and development – Laufen is introducing a groundbreaking alternative to more traditional ceramics and hugely expanding the possibilities of ceramic design and production.

A revolution in the formal language of ceramics: Strong and malleable, SaphirKeramik permits the creation of wafer-thin yet 3-4 mm robust walls and tight-edge radii of just 1 to 2mm. Its slender profile renders it space-saving, lightweight and environmentally friendly.

SaphirKeramik derives its exceptional hardness and strength from its component

corundum, (Al<sub>2</sub>O<sub>3</sub>), a colourless mineral found in eponymous sapphires. Rigorous testing has revealed that its flexural strength is equal to that of steel.

## Talking Products

The result of lengthy techno (eco)logical research by Laufen is a twice-as-strong, more ecological and thinner ceramic. The new ceramic is perceptibly sturdier, has greater flexural strength extending the range of material expressions and acquires a bright white colour.

Laufen can use a thinner ceramic body and a simpler structure to reduce the weight compared with conventional ceramic.

The benefits are manifold: lower raw material costs and energy consumption in production and transportation.

Stunning performance, granted; but also necessary in a society aiming at reducing consumption, that loves simplicity, and that is looking for a dynamic relationship with sensual pleasure. The result is clear to see - ceramics with thin, almost live edges: living square bowls designed by Andreas Dimitriadis, the washbasins out of the Kartell by Laufen collection designed by Ludovica and Roberto Palomba, VAL designed by Konstantin Grcic and INO designed by Toan Nguyen.

## KARTELL

**K**artell by Laufen: unlimited compositions that play with color and transform the bath environment from a specific architectural space to a fluid, flexible set of furnishings. The squared lines lend themselves to various interpretations, and the products – which combine exceptional design and very high quality of materials – generate a new habitat archetype.

Iconic, functional Italian design meets the industrial rigor of a leading Swiss ceramics brand, giving rise to a collection that breaks down the boundaries and barriers of the bathroom. Precisely this space can be seen as a refuge, a place to regenerate physical and mental wellbeing. Over the years, the bathroom has gone through remarkable evolution: from a space relegated to one corner of the home, organized to ensure healthy personal hygiene, it has become a welcoming setting, in line with the latest trends in interior design. The bathroom keeps pace with the progress of tastes and the transformations of our lifestyles, and the Kartell by Laufen collection, with its rigorous forms, offers the freedom to combine the lightness of transparency with the solid, robust presence of ceramics.

## INO RANGE

The new bathroom collection Ino, designed for LAUFEN by French designer Toan Nguyen, understands itself as a fresh interpretation of classic washbasin forms. The innovative collection skilfully uses the creative possibilities of LAUFEN's SaphirKeramik. Elegant, inviting and almost weightless objects, the pieces work with simple lines, creating soft yet extremely stable walls. The collection includes a wall-mounted washbasin, a countertop or half inserted washbasin bowl, as well as high-quality bathroom furniture and two bathtubs.

# INO

SaphirKeramik

# Laufen INO

In partnership with Laufen, Toan Nguyen and his design studio have created many award-winning and forward-thinking sanitaryware designs. A year after the introduction of SaphirKeramik™, Toan Nguyen started experimenting with design possibilities, and focused on the study of a washbasin as part of Laufen's SaphirKeramik™ project. The result of the joint venture was the creation of Ino, a spectacularly unique bathroom collection.

# LAUFEN

## URINALS

For LAUFEN, quality has two aspects: manufacturing knowledge and high degree of practical benefit that the finished bathroom affords the customer – which is often not immediately apparent. LAUFEN, a Swiss company manufacturing products that allow water, a precious resource, to be used sparingly, demonstrates in this manner a commitment to preserving natural resources and environmentally- friendly production.

# Laufen Urinals

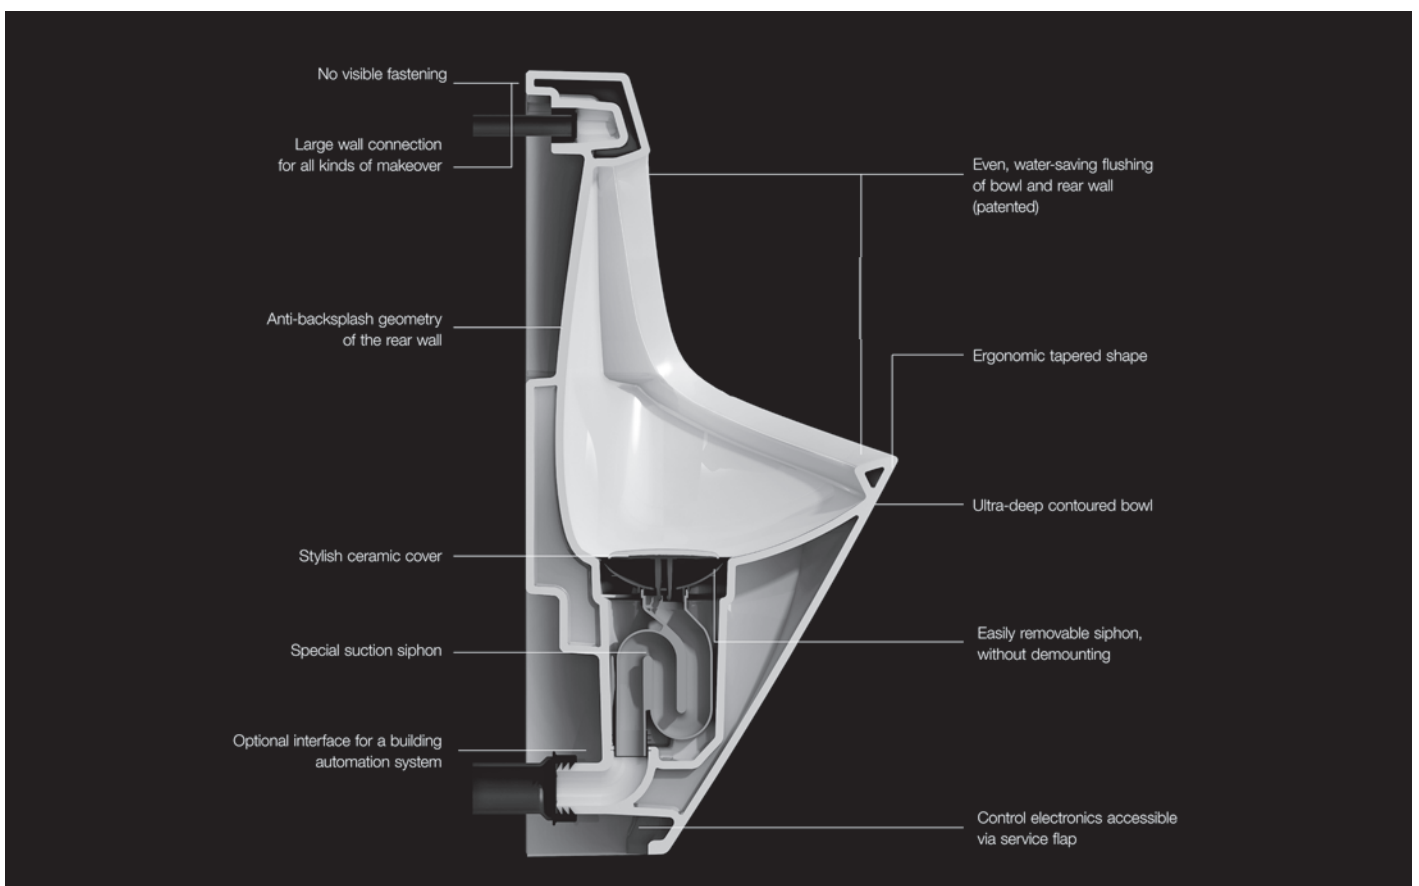

The Laufen urinals not only offers sparkling innovation, but also good design in public and highly frequented sanitary amenities. Visually appealing, the conical design of the Urinals also conceals ingenious inner workings in the shape of a 1 litre siphonic urinal which saves water and costs and is also completely odorless.

**Special feature:** Vacuum and performance tested

**Further options/accessories:** Surface refinement LCC (only white), with fly, LIS horizontal inlet connection, 1-litre siphon with horizontal outlet DN 50 (standard Europe, except CH and UK), 2-litre siphon with horizontal outlet DN 40 (standard UK), 1-litre siphon

with horizontal and vertical outlet DN 50 SH 50 (standard Europe, except CH and UK) and outlet DN 40 SH 50 (standard CH), LIS CU2 concealed frame for urinal without integrated control or LIS SMART CONTROL-U concealed kit for urinal flash control and front plate with infrared sensor.

# LAUFEN

## VANITY BASINS

For LAUFEN, quality has two aspects: manufacturing knowledge and high degree of practical benefit that the finished bathroom affords the customer – which is often not immediately apparent. LAUFEN, a Swiss company manufacturing products that allow water, a precious resource, to be used sparingly, demonstrates in this manner a commitment to preserving natural resources and environmentally- friendly production.

## COTTO<sup>®</sup> Simply Modish white wall hung toilet including soft close seat

The Simply Modish toilet has a name that simply speaks for itself. It is the cutting-edge design quality crafted in Thailand.

This unique modern cubic shape design with naturally curved lines is a perfect balance of style, quality and sustainability.

The wall hung toilet has a semi-elongated modern slim soft-close seat for your comfort and convenience.

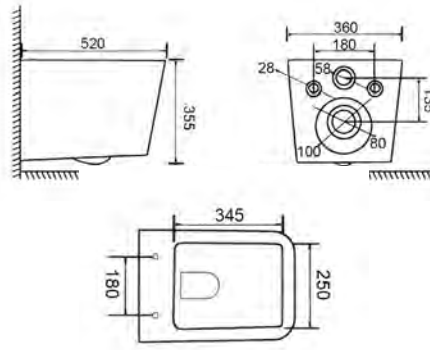

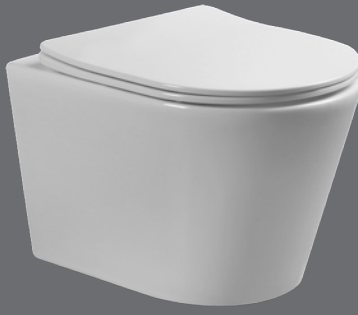

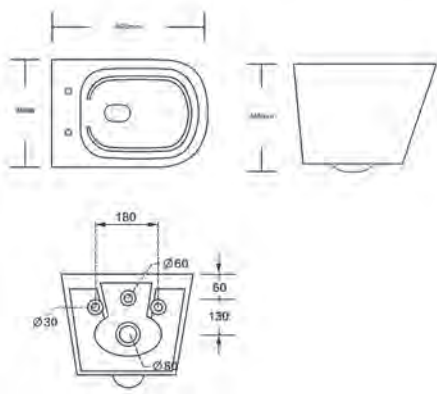

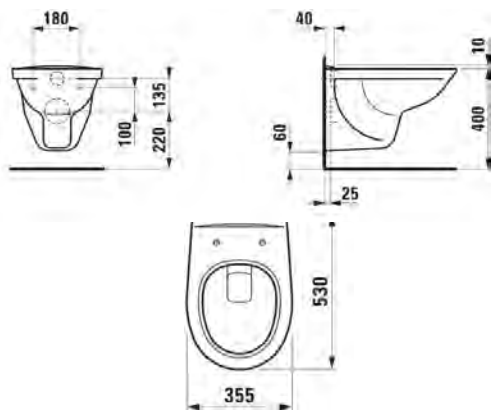

Triplex Flush: 3 directions water form. Efficiency cleaning bowl with 3 directions form and rimless design. Less germs / hygienic, with water consumption of 3 or 4.5 Liters (Normal lavatories in SA use between six and 12 litres for each flush and account for 30% to 40% of a household's water use).

It features an "open" rim bowl with a hygienic coating.

The included seat is soft closing and can be easily removed to upgrade to a smart seat.

This good looking and great for your environment toilet design carries SCG Eco value label for less raw materials used in the production

# CISTERNS

# Dual Flush Cisterns

This Compact Flush System is designed to fit the full range of flush plates, so our quality will match your style.

TORINO 74 dual flush mechanical actuated cistern with net and anti-condensation cover.

This Compact Flush System is designed to fit the full range of flush plates, so our quality will match your style.

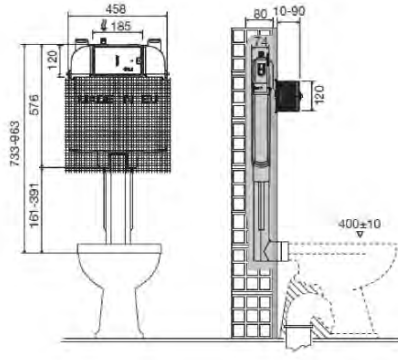

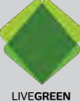

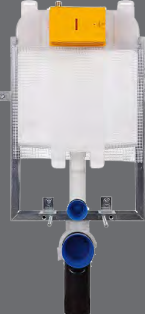

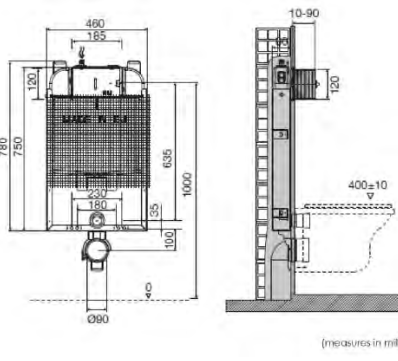

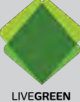

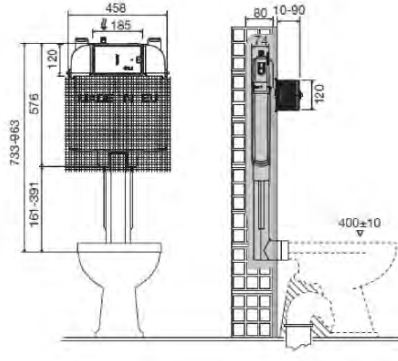

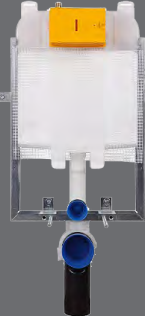

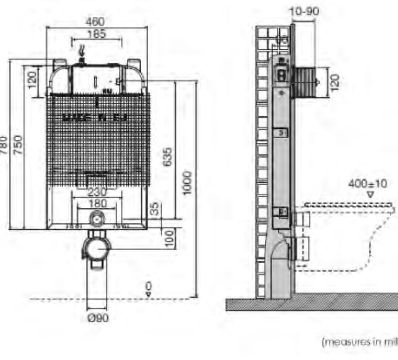

Dual flush cistern Technical features include:

- 10 Year Warranty
- Polypropylene (PP) cistern highly resistant and inalterable to thermal stress
- Reduced thickness of 80 mm
- Easy installation
- Easy access for maintenance
- Easy flush volume adjustment (Fast Adjustment System)
- Anti-condensation EPS - Polysterene cover plate (total thickness of 80 mm)
- Special fiber net for cement grip
- Waste pipe with Polysterene (EPS) cover to provide incidental mistakes during installation and to reduce noise during flush
- Silent AZOR PLUS float valve certificated according to the NF standard category Class I
- Certified cistern according KIWA/SABS/SAI/WRAS standards
- CE EN 14055 marking CL1
- "A" class for the Energy Efficiency in compliance with the ANQIP Authority requirements

OLI80 is ideal for wall-hung toilets and is suitable for application in masonry walls or solid-walls that are bricked lined. this cistern is compatible with all wall-hung pans Dual flush cistern Technical features include: - Structure: Metal, galvanized, corrosion-resistant- 10 Year guarantee (If the product is not correctly installed the guarantee is not valid).

Polypropylene (PP) cistern highly resistant and inalterable to thermal stress. The reduced thickness of 80 mm - Easy installation - Easy access for maintenance - Easy flush volume adjustment (Fast Adjustment System) - Anti-condensation EPS - Polystyrene cover plate (total thickness of 74 mm- Special fibre net for cement grip - Waste pipe with Polystyrene (EPS) cover to provide incidental mistakes during installation and to reduce noise during flush - Silent AZOR PLUS float valve certificated according to the NF standard category Class I - Certified cistern according to KIWA/SAI/WRAS/SABS standards - CE EN 14055 marking CL1 - "A" class for the Energy Efficiency in compliance with the ANQIP Authority requirements.

This cistern is rated as a LiveGreen product by Italtile management due to the fact that the delayed filling mechanism saves 500 ml water - unlike some comparative products.

## LAUFEN PALLADIUM BATH

Laufen is one of the world's top quality manufacturers of sanitaryware and brings you this top quality steel Palladium bath.

The enamel process is of absolute resoluteness, however you need to be a careful owner and this bath will last you a lifetime. This steel bath will retain the warmth of the water once in use and will not crack from movement.

This drop in bath is of traditional shape and has holes pre-drilled at the head of the bath for the waste and overflow for your convenience.

This bath has an environmentally friendly aspect in that it is made from recyclable ma-

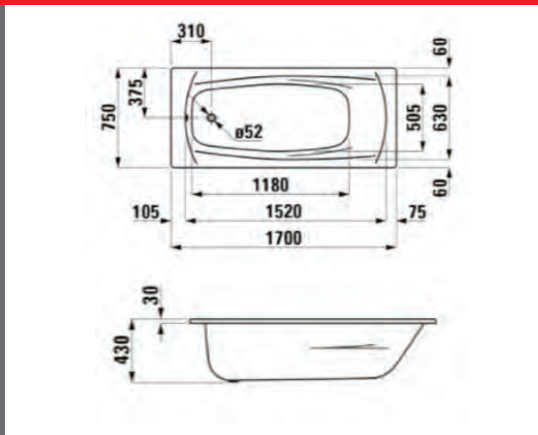

terials should it one day be discarded. Laufen also uses sustainable methods of production in their factories. Bathtub, drop-in version, enamelled steel (3.5 mm)

- Robust due to very heavy enamelled steel
- All models have high deep-

- ness of 400mm and more
- Abrasion-proof, heatproof and shock resistant
- Hygienic and easy to clean
- Very easy to install
- Naturally recyclable
- Available in anti-slip
- LAUFEN warranty: 30 years

# TIVOLI

The Italian quality, design aspects and craftsmanship of this tap range are outstanding and is therefore supported by a 15 Year Guarantee. This promise is backed up a national service team based throughout South Africa. The Tivoli product range strongly supports Italtile's LiveGreen ethos threefold: by manufacturing in a responsible manner where the plating plant has zero discharge; recycling all water used during manufacture and finally it has a controlled, reduced flow rates.

## DOMINUS

**M**odish and modern with straight lines and precise edges. The Verdi Atlas comes from a design aesthetic that embraces the now, instantly transforming any bathroom into a contemporary space and lending it an air of considered refinement. Discreet and compact, the Verdi Atlas pan works in conjunction with a concealed cistern. Also available with a perfectly matched, square-edge cistern.

# SHOWER SEATS

## ItalCare Foldable Shower Seat

## Technical Drawings

## Specifications

### ItalCare Foldable Shower Seat

10 x 450mm

Grade 304 polished stainless steel and acrylic.

Water slots in the seat for water drainage.

Can hold up to 120kgs if installed correctly onto a sound brick wall.

Smeg is an Italian home appliance manufacturer based in Guastalla, near Reggio Emilia in the north of the country. Smeg has subsidiaries worldwide, overseas offices and an extensive sales network. Smeg has designed innovative household appliances for all everyday environments since 1948. The headquarters are situated in Guastalla, in Emilia Romagna, an outpost for a long view over the countryside from the river Po. Passion for research begins here. In the field of aromatic essences delimited by a perimeter of four thousand poplars, technological innovation comes together with quality culture for an all-Italian household appliance manufacturing activity.

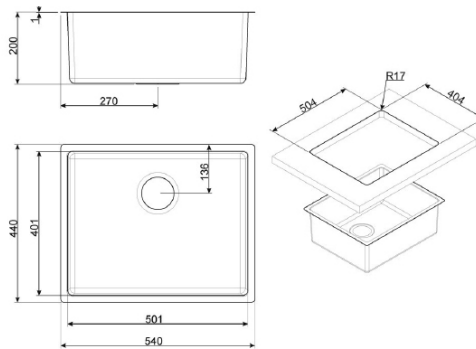

Vision, intuition, international reach: owing to a business culture that places the utmost attention on quality, on technological contents with an extreme focus on energy savings, the Smeg Group is recognised on an international scale as a mastermind of excellence Made in Italy.
