Personalised décor cut

Real homes, Surreal beauty

A Bryanston home that epitomises elegance.

WIN R10 000 WORTH OF 3D WOOD See pg. 3 for details

DESIGNED TO BE REFINED

Italtile is constantly working in collaboration with interior designers and architects to bring beautiful living to commercial and residential spaces. This discrete Bryanston family called on the 29 years of experience of Merle Comninis and Italtile Bryanston's Brenda Mphamu to create a vision that would put them at the centre of simple elegance. Merle worked closely with the family and Brenda, and has used Italtile on numerous occasions over the past decade. The task of renovating one guest bathroom and creating two new bathroom spaces was a design collaboration that has resulted in a space of breathtaking calm.

At Italtile, we see ourselves as the catalyst with which interior designers turn their vision into works of art. We are also very excited to offer a great network of recommended interior designers to our customers. If you're a homeowner looking for an interior design partner that has worked closely with Italtile, please contact us and we'll put you in touch with an expert in your area. And if you're a designer that has a vision that's unique and want to bring it to life with a team that knows their business, contact Nicole.

WITH 3D WOOD, DIY MEANS DELIGHT IN YOUR STYLE

Open all your windows, puff your cushions and let a breath of fresh air come into your living space. There is no good earthly reason why interior wood design should be a splinter in your side. Introducing 3D Wood, a new innovation, brought to you in beautiful style by Italtile and our visionary partner, Global Stone. A sophisticated first in South Africa.

Looks aside, the most stunning thing about this wonder-cladding is that its installation is so easy. The interlocking panels make doing-it-yourself a delight. You simply select your finish, line up the panels and glue or nail gun them to the wall.

All the panel varieties are FSE certified, three finishes are produced from sustainable forests and two of them from reclaimed wood. These factories give support to the communities around them and are also run with ecology in mind. It's a celebration of natural beauty.

The authentic timber comes in these elegant options: Baroque Acacia, Baroque Maple, Baroque Black Walnut, Reclaimed Mixed and Reclaimed Pine.

DIY IN 3 EASY STEPS

1. Select a finish option
2. Glue or nail gun it to your wall
3. Invite people over

Imagine it lining the walls above the kitchen counters, adding a whole new natural dimension to your bedroom as a feature wall or giving an extra touch of warmth to your bar area. If your office is dull, use 3D Wood to create an air of relaxed discernment.

There are wall to wall possibilities.

UNTAPPED STYLE

Make your bathroom beam with our wide range of sinks, baths, taps, basins, tiles and wall designs, all at your nearest Italtile store.

"The style of a bathroom vanity should echo the style of the furnishings in the bedroom but doesn't have to be an exact match. Use the lines of the interiors as a guide and opt for either curves or geometrics when choosing."

From: Melanie Ewing - Interior designer and owner from Chapters for Italtile

A BEAUTIFUL PARTNERSHIP: THE NELSON MANDELA CHILDREN'S HOSPITAL

Nelson Mandela's dream of building a state-of-the-art, specialised paediatric facility to serve the children of South Africa has been realised. The construction is complete and the Nelson Mandela Children's Hospital will be welcoming its first patients this year. Italtile has played a vital role in this project.

Idral, the Italian tap pioneers have 45 years of experience in the manufacture of sanitary appliances. Another Italian company, Atlas Concorde, now in its 40th year of activity, has been synonymous with strength, ethics and reliability. And last but not least: Ceramic Industries, the largest manufacturer of floor and wall tiles in Southern Africa.

Over the past 10 years, Italtile has been working together with highly respected international companies in the building sector, providing total solutions for large-scale developments that require extensive expertise.

Together, we provided the hospital with R3.5 million worth of products. Throughout the project we placed huge emphasis on expert service and easy maintenance. We are very proud to be part of a great institution and a great legacy.

The culmination of our years of experience is the new Nelson Mandela Children's Hospital. Our outstanding partners on this very special project were: LAUFEN, who have more than 120 years experience, are a Swiss brand that stand for precision, quality, design and sustainability in the context of total bathroom concepts.
